PLANETS AS LEGENDS

The legends that continue to inspire us are usually of people with extraordinary ability in one particular area and there is none older than the stories about the characteristics assigned to the various planets in the heavens. How they are laid out in relation to each other becomes a very ancient teaching story about astronomy and the unique role each planet has in contributing a quality necessary to the ongoing evolution of our world.

- The **SUN** at the centre is a constant source of power and inspiration beaming its light of knowledge stimulating its nearest neighbours:-

MERCURY & VENUS

- **MERCURY** with thoughts and ideas that excite the mind into the pursuit of the next lesson we need to learn, life is a playground capturing the imagination of
- **VENUS** to pursue the delights of satisfying her desire for love and our need to enjoy ourselves. and so at an inner level these are the stimulus that our nearest neighbour the:-

MOON & EARTH

- **MOON** constantly churning feelings, constantly judging would I like this or that, emotionally attracting and rejecting what makes us happy or sad.
- **EARTH** is the body, the place where we hold these images and is inspired by this central power or spirit with what we can do to make us happy and content.
- Just like with advertising on TV we don't buy into every idea that is sold to us and usually we only act on the ones that we are passionate enough about and so call up:-

MARS & JUPITER

- **MARS who** takes the necessary action, driven by the need to get ahead. The courage and ambition to get the desires met, by whatever means necessary, is told by our history where the biggest bullies seem to prosper most. Following the Earths instructions it terrorises the inner life who only wanted to have fun and enjoy life. When the action taken is beneficial we meet:-
- **JUPITER** our protector in the heavens. We get to expand our horizons and inspire faith in those around us. WE become at one with everyone around us
- However, when our desires get frustrated we may initially externalise it as anger but it inevitably leads to the grief of:-

SATURN

- **SATURN** the hard taskmaster gets us to face the truth about ourselves and the impermanent nature of it all. Grief is the outcome when we resist the lessons and refuse to accept life's limitations.
- '*When we act in haste we get to repent at our leisure*.'
- Saturn is the planet furthest out from the Sun and his icy belt shows the boundary wall he puts up to indicate this far and no further. His role serves as the traffic lights we must obey.

RAHU AND KETU

- There are two other sources of energy that we draw from also but these are not visible, and yet have the capacity to disrupt everything- just when you thought you had things under control some unknown entity steps in and disrupts the whole show with usually surprising results that can cause a total change of direction in the life. This is the rogue factor you hadn't allowed for.
- **RAHU** or the North Node and **KETU** or the South Node are calculated points in the heavens based on the relationship between the SUN, the Moon and our Earth.
- **RAHU** stirs us at a psychological level to compulsively go after what we want creating chaos if necessary while
- **KETU** has no desire for the worldly and makes mystics of us.

Pitta –Vata - Kapha

DOSHA - TEMPERMENT

- **KAPHA** (Mucus)– imbalance = Sadness

Balance = OJAS- vigour

- **PITTA** (Bile) – imbalance = Anger

Balance = TEJAS – radiant and smart

- **VATA** (wind) – imbalance = Fear

Balance = PRANA – Calmness

Disturbed Vata

leads to constipation that leads to fear that leads to anger that leads to sorrow

REMEDY - MIRROR

- **MANTRA – SELF-DENIAL – GENEROSITY**
- **BACH FLOWER RESCUE REMEDY**
- **HERBS –**
- **GEMS –**
- **MUSIC, DANCE, POETRY, ACTING**
- **OILS –**
- **DECORATE, GARDEN, SILK, COUNSELLOR**
